

## 8.0 Implementation and Sequencing

### 8.0 Implementation and Sequencing

8.1 Introduction	108
8.2 Implementation Design Criteria	109
8.2.1 Sequencing of Development in Regeneration Zoning	109
8.3 Implementation and Funding	111
8.4 Key Infrastructural Requirements/Sequencing	111
8.4.1 Schools Requirements	111
8.4.2 New amenity spaces including Cookstown and Belgard Urban Squares	112
8.4.3 Streets and Public Realm	112
8.4.4 Social infrastructure	112
8.4.5 Neighbourhood/Sub Neighbourhood Requirements	113
8.5 Further Infrastructure, Services, Civic, Residential and Amenity projects in Tallaght	121

## 8.1 Introduction

*It is an objective of the Council that development within the plan area is undertaken in an orderly and sustainable manner. The development of the identified regeneration lands at Cookstown and Broomhill alongside the Town Centre lands should generally be phased in accordance with the sequential approach:*

- *Development should extend outwards from the town centre and high-quality public transport with land closest to the centre and public transport nodes being given preference, i.e. 'leapfrogging' to stand alone or isolated areas should be avoided; and*
- *A strong emphasis will be placed on encouraging infill opportunities adjacent to compatible existing uses and ensuring better use of under-utilised lands;*

Only in exceptional circumstances should the above principles be contravened, for example, where a barrier to development is involved or where proposals are brought forward for sites approximately 2 Hectares and above, particularly within the regeneration lands that comply with the Urban Framework of the LAP, the Planning Authority may consider that the proposal can establish its own identity and amenity in the transition phase of the area.

As such, subject to the nature and scale of the proposal and the delivery of the Urban Framework, in general, the Planning Authority will not consider such proposals to be isolated piecemeal development or premature. In this context, the Planning Authority will encourage integrated proposals and the amalgamation of proposals/landownerships.

Any exceptions must be clearly justified by local circumstances and such justification must be set out in any planning application proposal. The Council may, in certain cases, phase permitted development where this is considered necessary in order to ensure:

- i. an appropriate balance between employment, residential and service facilities (schools, shopping, community facilities etc.) and other uses that are required to increase the self-sufficiency of the area or particular neighbourhood.
- ii. the delivery of infrastructural services in tandem with development, including water, sewerage and road infrastructure, that is required to safeguard the environmental quality and public safety of the area.

## 8.2 Implementation Design Criteria

### 8.2.1 Sequencing of Development in Regeneration Zoning

Further to Chapter 2 and 3 of the Plan, proposals for redevelopment within the REGEN lands, will be assessed against the relevant criteria within the Urban Design Manual – A Best Practice Guide (2009), the Design Manual for Urban Roads and Streets (DMURS) (2013) and/or the Retail Design Manual (2012) as appropriate. The Design Statement to accompany redevelopment proposals in REGEN zoned lands should be in accordance with Chapter 2 of this Plan and also specifically address the following criteria:

1. Demonstrate a clear transition towards a more urban form of development and a traditional street network in accordance with Chapter 2 and 3;
2. Address connectivity and linkages in the area and demonstrate that the development of the site would not give rise to isolated piecemeal pockets of development with residential uses that are disconnected from public transport, public realm, retail, amenities and/or other residences;
3. Residential development should be very carefully designed at the lower levels in particular adjacent to existing busy roads, and/or roads that are subject to significant movements by Heavy Goods Vehicles (HGVs) without demonstrated or proposed improvements to upgrade the street network in accordance with the Plan;
4. Demonstrate that the potential for noise pollution, air pollution or other nuisance from established industrial uses will not exceed acceptable environmental standards. The Planning Authority may seek a report from a suitably qualified person to identify and quantify sources of noise pollution, air pollution, or nuisance, assess the potential impacts on the proposed development and provide a series of recommendations to mitigate the impacts of any pollutants insofar as possible (e.g. orientation and layout of dwellings, positioning of openings and insulation); and
5. As part of any planning application for redevelopment, the developer shall demonstrate a rationale for the site selection of the proposed development in relation to existing, permitted and proposed development. In general, integration with adjoining development and/or the urban form of the established Centre will be required to prevent piecemeal or premature development. Developers should sequence the delivery of Cookstown radially from the Town Centre, Luas stops and the perimeter.

*The purpose of the sequencing requirements is to ensure that a minimum level of infrastructure, facilities and amenities are provided together with new residential development.*

While the sequencing requirements set out hereunder relate to growth up to 2040, the Core Strategy of the County Development Plan shall take precedence in regard to the capacity of the area to deliver residential units. Development proposals within the LAP area should therefore demonstrate consistency with the housing capacity and housing forecasts for the Tallaght Metropolitan Consolidation Town in the Core Strategy of the South Dublin County Development Plan 2016–2022 and any revisions made in successive Development Plans.

The purpose of the sequencing requirements is to ensure that a minimum level of infrastructure, facilities and amenities are provided together with new residential development. This sequencing schedule is based on the premise that the number of dwelling units that may be permitted in each phase of development is dependent on the provision of a pre-determined amount of infrastructure, facilities and amenities to serve each neighbourhood/sub-neighbourhood. To ensure flexibility, the proposed phasing schedule is sequential (linked to housing output/bed space delivery) rather than being strictly time specific.

The Planning Authority may set aside any phasing impediment where it is demonstrated to the satisfaction of the Planning Authority that the infrastructure in question is not in itself essential for the development being proposed. In some instances, the infrastructural requirements for one area (e.g. public open space) may be provided in an immediately adjoining area subject to demonstration that the infrastructure/facility will benefit residents of the area within which residential development is proposed.

## 8.3 Implementation and Funding

The development of lands within the plan area is subject to the SDCC Development Contribution Scheme. In some cases, the completion of works required to facilitate development are outside the direct control of either South Dublin County Council (SDCC) or the landowners. South Dublin County Council is committed to implementing this Plan and will proactively manage and promote the integrated development of the LAP lands. All measures and funding streams available for the release of funding to provide for the delivery of infrastructure and facilities in Tallaght will be pursued, including the Urban Regeneration Development Fund (URDF) as part of the implementation of the National Planning Framework (NPF).

A number of key projects have been identified through the LAP urban masterplanning process, which are considered important in achieving a quality urban environment for Tallaght. These projects relate to the provision of key infrastructure, services, civic, residential and amenity projects in Tallaght which will act as a catalyst for the wider and long term growth of Tallaght, as a living town and

the thriving heart of South Dublin County. Tallaght Town Centre is entering a period of renewed growth and revitalisation. Enhancing the Town Centre's identity, character and sense of place, are key to its development potential. These projects have informed the sequencing/infrastructural requirements for each neighbourhood/sub-neighbourhood. Some projects have already received funding under the Urban Regeneration Funding Scheme (URDF). Securing this funding will enable the delivery of infrastructure necessary to secure the objectives of the Plan.

In addition, and in accordance with the provisions of Section 48 (2)(c) of the Planning and Development Act 2000 (as amended), SDCC is investigating the potential for a Supplementary Development Contribution Scheme that may include requirements for the plan area to provide for the delivery of strategic public infrastructure including principal route connections, strategic open space and associated pedestrian and cyclist infrastructure, which will support the delivery of the required infrastructure outlined in LAP.

## 8.4 Key Infrastructural Requirements/Sequencing

The following tables identify the key pieces of physical and social infrastructure required in order to facilitate development, alongside associated services and facilities essential for the health, well-being and social development of the plan area. Development proposals within each of the identified neighbourhoods/sub-neighbourhood must clearly demonstrate how it is proposed to comply with/provide the identified key infrastructure required for a particular area as part of any planning application. Individual smaller or standalone sites will be required to demonstrate how it is proposed to provide for/contribute towards the delivery of key infrastructure applicable to their particular neighbourhood/sub-neighbourhood. Such requirements will be reviewed over the lifetime of this plan.

### 8.4.1 Schools Requirements

In regard to school requirements, the Department of Education and Skills uses a Geographical Information System (with data from the CSO, OSI and Department of Social Protection in addition to Department of Education and Skills own databases) to identify where pressure for additional primary and post-primary school places will arise, and cater for same either via new schools or expansion of existing schools. Demographic changes within the Tallaght

Area will continue to be monitored by SDCC and the Department of Education and Skills on an ongoing basis and it is possible that further or altered educational requirements will arise over the lifetime of this Plan and subsequent plans.

The Provision of Schools and the Planning System, a Code of Practice for Planning Authorities, published jointly by the Department of Education and Skills and the Department of Environment Heritage and Local Government, sets out the best practice approach to facilitate the timely and cost effective roll out of school facilities. South Dublin County Council will continue to support and facilitate the provision of primary and post primary school facilities to serve the needs of the plan area, and support the co-location of schools or 'stand alone' institutions where appropriate.

At this stage it is anticipated that 2 primary schools and a secondary school will be required within or in very close proximity to the plan area. The plan identifies a potential location for the first primary school and the secondary school. A site for the second primary has now yet been identified. It is intended that South Dublin County Council will maintain a strong working relationship with the Department regarding

the provision of schools within the plan area. The plan does identify a set of SDCC objectives for locating the second primary school, however, this will need to be actively assessed and monitored within the plan area once permissions have been granted for c. 1600-2,000 units.

#### **8.4.2 New amenity spaces including Cookstown and Belgard Urban Squares**

A key component in the delivery of the Cookstown Regeneration lands will be the provision of a mix of new and improved amenity spaces. This will include both pocket park spaces and the delivery of two new Urban Squares at Cookstown and Belgard. It is intended that the mix of smaller pocket parks will be delivered through private development, however, at this stage it is likely the Council may be required to take a more active role in the delivery of the two large urban parks. These key pieces of infrastructure will be required to be delivered in tandem with and prior to the completion of each block of development (as detailed below in section 8.4.3) within the town centre and Cookstown Regeneration lands. The specific location of these key green space will be subject to the following criteria:

##### **Belgard Urban Square**

- The park space shall provide for a minimum area ranging from c. 11,500-12,000sqm,
- The park space shall provide a strong sense of place, providing a green edge along the proposed Belgard Square North Link Road
- The park space shall be designed in a manner which facilitates green connections to adjoining streets,
- The park space shall be overlooked by surrounding buildings providing passive surveillance, safety and security

##### **Cookstown Urban Square**

- The park space shall provide for a minimum area ranging from c. 6,500-7,000sqm,
- The park space shall provide a strong sense of place, providing a green edge at the junction of or in close proximity to the junction of a redesigned urban street along Cookstown Road and Second Avenue,
- The park space shall be designed in a manner which facilitates green connections to adjoining streets,
- The park space shall be overlooked by surrounding buildings providing passive surveillance, safety and security

#### **8.4.3 Streets and Public Realm**

There is an existing network of streets across the plan lands, however, there is a need to provide improved and enhanced connectivity across the plan area promoting the use of more sustainable modes of transport. This will be achieved through a mixture of new and improved streets. The framework plan shows the arrangement of these streets, which will be delivered both directly through new development and by the Council improving and building new streets. In particular the following new and improved streets are required to enable development.

##### **New**

- Belgard North Link Road
- Airton Road Extension
- A new Secondary Route connecting Cookstown Road to Old Belgard Road
- A new Secondary Route connecting Cookstown Road to Cookstown Way

##### **Improved**

- Cookstown Road
- Second Avenue
- Fourth Avenue

*A key component in the delivery of the Cookstown Regeneration lands will be the provision of a mix of new and improved amenity spaces.*

#### **8.4.4 Social infrastructure**

There are a number of services and facilities essential for the health, well-being and social development of the plan area. The tables below provide an indicative outline of the desirable services and facilities which could be required within each neighbourhood under the heading 'Associated Services'. Such services include Childcare, Health and Community Facilities.

### 8.4.5 Neighbourhood/Sub Neighbourhood Requirements

Town Centre					
Infrastructure Requirements for the Town Centre Area					
Physical Infrastructure <sup>1</sup>	Physical	<ul style="list-style-type: none"> <li>Enhanced public realm including improved connectivity to public transport nodes. (LA<sup>2</sup> – Developer/SDCC)</li> <li>Upgrade of Chamber Square, for cultural and community uses including a pedestrian link to Belgard Civic Plaza/Park in tandem with new development. (A – SDCC)</li> <li>Bus Connects Transport Hub and Interchange land take as identified in the Urban Design Framework for this plan or otherwise agreed with the Lead Agencies. (LA – NTA/TII/SDCC/Developer)</li> <li>Belgard Square North Link Road and Airton Road Extension prior to or in tandem with new development. (LA – SDCC)</li> <li>Uplift of River Poddle to the north east of the Town Centre neighbourhood in tandem with development (LA – Developer Led/SDCC)</li> </ul>			
	Social Infrastructure	<table border="1"> <tr> <td>Schools</td> <td> <ul style="list-style-type: none"> <li>1 no. post primary school – location to be subject to agreement with the Department of Education and Skills</li> </ul> </td> </tr> <tr> <td>Open Space</td> <td> <ul style="list-style-type: none"> <li>1 no. new urban square measuring a minimum of c. 11,500–12,500 sqm to be developed on council lands adjoining the new Belgard Square North Link Road alongside the delivery of the new links roads at Belgard Square North and the Airton Road extension. (AL – SDCC)</li> <li>1 no. pocket park measuring a minimum of c. 3800 sqm to be developed alongside the re-development of the former Uniphar lands along Belgard Square North. Pocket Park to be provided in a phased manner alongside the development of these lands to the north east of the town centre.</li> </ul> </td> </tr> </table>	Schools	<ul style="list-style-type: none"> <li>1 no. post primary school – location to be subject to agreement with the Department of Education and Skills</li> </ul>	Open Space
Schools	<ul style="list-style-type: none"> <li>1 no. post primary school – location to be subject to agreement with the Department of Education and Skills</li> </ul>				
Open Space	<ul style="list-style-type: none"> <li>1 no. new urban square measuring a minimum of c. 11,500–12,500 sqm to be developed on council lands adjoining the new Belgard Square North Link Road alongside the delivery of the new links roads at Belgard Square North and the Airton Road extension. (AL – SDCC)</li> <li>1 no. pocket park measuring a minimum of c. 3800 sqm to be developed alongside the re-development of the former Uniphar lands along Belgard Square North. The delivery of such facilities will be demand driven as the area develops. The SIA indicates an average of 1.79 GP’s/1000 population should be provided. (AL – HSE/Developer in consultation with SDCC)</li> </ul>
<b>Village Centre</b>		
<b>Infrastructure Requirements for the Village Centre Area</b>		
Physical Infrastructure	Physical	<ul style="list-style-type: none"> <li>Enhanced public realm including improved connectivity to public transport nodes. (AL – Developer/SDCC)</li> </ul>
	Open Space	<ul style="list-style-type: none"> <li>Enhancement of existing urban spaces/green spaces within the village (AL – SDCC)</li> <li>Provision of a new urban space on the corner of main street and the old Greenhills Road</li> </ul>
Associated Infrastructure	Childcare	<ul style="list-style-type: none"> <li>The indicative unit growth for the area would generate a requirement for 9 additional spaces<sup>7</sup>.</li> <li>All new residential developments and particularly those in excess of a 10 minute walk-time from existing childcare facilities with sufficient capacity to accommodate that development, will be required to comply with the minimum childcare standards and the provision of childcare facilities as part of specific developments. (AL – Developer driven based on demand analysis)</li> </ul>

<sup>6</sup> Derived from ensuring a space for the anticipated children in the 3-4 age range within the population growth for the area.

<sup>7</sup> Derived from ensuring a space for the anticipated children in the 3-4 age range within the population growth for the area.

## 8.5 Further Infrastructure, Services, Civic, Residential and Amenity projects in Tallaght

### Whitestown Hub

#### Infrastructure Requirements for the Whitestown Area Hub

Physical Infrastructure	Physical	<ul style="list-style-type: none"> <li>Enhanced public realm including improved connectivity to public transport nodes. (AL - Developer/SDCC)</li> </ul>
	Open Space	<ul style="list-style-type: none"> <li>Provision of a new linear pocket park along Whitestown Way (AL - SDCC)</li> <li>Enhancement of Whitestown Stream for ecological value and as an amenity route. (AL - SDCC)</li> </ul>

*The Local Area Plan recognises that there are a number of other key infrastructure, services, civic, residential and amenity projects in Tallaght town centre which upon delivery will act as a catalyst for the wider and long term growth of Tallaght, as a living town and the thriving heart of South Dublin County.*

In addition to the requirements set out above; the Local Area Plan recognises that there are a number of other key infrastructure, services, civic, residential and amenity projects in Tallaght town centre which upon delivery will act as a catalyst for the wider and long term growth of Tallaght, as a living town and the thriving heart of South Dublin County. Some of these key projects have already received funding or part funding under the Urban Regeneration and Development Fund.

The following outlines the key projects (not covered within the tables in section 8.4) which are recognised as key priorities with regard to unlocking and energising Tallaght

town centre, in the context of the LAP and the current development interest, in advancing residential and other commercial development projects in the town centre core area.

- Tallaght Innovation Hub
- Elderly Housing (Sean Walsh Park)
- Tallaght Stadium Fourth Stand
- Sean Walsh Park Upgrades (Sporting - Astro Pitches)
- Green Amenity Routes at Killinarden
- Tymon Library
- N81 and Belgard Road Upgrades
- Links to Tymon Library and Bancroft Park
- Tallaght Heritage Trail
